

SMART FM- Innovation for a Sustainable & SMART Built Environment

**15 - 16 March 2022
Singapore EXPO**

THE 5TH EDITION OF SMART FM - Innovation for a Sustainable & SMART Built Environment

Design for Maintainability, health and safety requirements, technologies like remote monitoring and the growing environmental push towards sustainability are factors impacting the future of facilities management and the built environment.

The 5th edition of FMC will reflect these priorities by featuring innovations, solutions and perspectives on evolving developments that will help industry sector professionals understand and meet emerging challenges. Featuring thought-leaders and practitioners

in the forefront of their areas of expertise, the program will offer key insights and updates on issues impacting smart and sustainable facilities management and built environments. Highlights include:

- **Effective design for smart and sustainable built environments**
- **New perspectives on facilities management post COVID-19**
- **Considerations in future-proofing facilities with the use of technology**
